

Coin meter for water LMZ 0115

contains Option O

Description

The prepayment can be set by the customer. The water volume and number of coins can be set. After inserting the coin into the slot the display shows the released volume of water. The solenoid valve switches on at the same time. The water volume will be reduced liter by liter. The water volume will be increased if additional coins are placed into the slot.

- Design with modern microprocessor technology
- High-grade precision prepayment verifier with wire and thread barrier, returning of counterfeit money
- Insertion optional: 0,10; 0,20; 0,50; 1,00; 2,00 € or token
- For each coin a value of 1-9.999 Liter can be set
- The unit adds any number of coins until the value of 9.999 Liter has been reached
- Simple setting by logical menu
- 2-line LCD to show the remaining water volume, the coin selection and coin type.
- Approved for billing, because a calibrated water meter is integrated
- Capacity of the coin container: 120 coins EUR 0,50
- Simple connection with 5-pole plug-in connection
- Powder-coated stainless steel housing (RAL 7035 light gray) with cylinder safety lock
